ICDP Support for Value Addition: New Coffee Roasting and Grinding (R&G) Units

The Coffee Board gives a subsidy on machinery for setting up a new coffee roasting and grinding unit. The 2026-27 round has closed, and the rules below describe the scheme for the next round.

What you may get

Subsidy of 40 percent of the machinery cost, up to Rs 15 lakh, for new roasting, grinding and packaging machinery. SHGs, FPOs, women entrepreneurs, SC and ST and differently abled beneficiaries get 50 percent, with the same Rs 15 lakh ceiling. The money is paid into the bank account through PFMS after the Board inspects the installed machines, and it depends on funds.

Who it is for

Individuals, partnership firms, private limited firms, self-help groups, growers' collectives and coffee cafes that want to set up a new coffee roasting and grinding unit.

Main conditions

- The unit must hold a valid business licence from the statutory authorities.
- Units that already took subsidy in the XI Plan, XII Plan or MTF period are not eligible.
- The scheme does not apply to units whose machinery was installed and running before the notification of 20 May 2026.
- Machines may be bought and installed only after the Board issues the feasibility report.
- Priority goes to low coffee consuming states, then to applicants from the North-East, women entrepreneurs, FPOs and SHGs, differently abled persons and SC and ST applicants.

Documents

- Notarised lease, rent or ownership document for the site
- Layout plan or blueprint of the proposed unit
- Quotations from the machinery suppliers
- Photo identity such as Aadhaar, ration card, PAN card, passport, driving licence or voter ID
- Bank pass book copy with account number and IFSC code
- Caste or disability certificate (40 percent or more) for SC, ST and differently abled applicants
- For the final claim: tax invoice, FSSAI licence, GST registration, municipal licence and photographs of the installed machines

How to apply

1. When the Board opens a round, apply for the technical feasibility report through the India Coffee App with the lease, layout plan and quotations.
2. Buy, install and start the machinery only after you receive the feasibility report on the app.
3. After installation, send the final claim on the India Coffee App with the invoice, licences and photographs.
4. A Coffee Quality Division officer inspects the unit, and approved subsidy is paid into your bank account through PFMS.
