Krishi Shakti Yojana

A Madhya Pradesh farm mechanisation scheme started in 2010-11. It gives small and marginal farmers an extra state subsidy on power tillers and builds model Yantradoot villages.

What you may get

Small and marginal farmers who already got the central SMAM subsidy on a power tiller receive an extra 25 percent top-up from the state, up to Rs 30,000. The scheme also develops Yantradoot villages as model villages for farm mechanisation.

Who it is for

Small and marginal farmers of Madhya Pradesh who bought a power tiller with subsidy under the central SMAM scheme. Yantradoot villages are chosen by the department.

Main conditions

- The farmer is in the small or marginal category.
- The farmer has received the subsidy for a power tiller under the central Sub-Mission on Agricultural Mechanization (SMAM).
- The top-up is paid only on cases that were sanctioned after 1 April 2011 under the central scheme.
- A Yantradoot village is picked where Scheduled Caste, Scheduled Tribe and weaker farmers are many and the level of mechanisation is low.

How to apply

1. Apply under the central SMAM scheme first, because the top-up is paid only on cases that got that subsidy.
2. Submit the application for the power tiller subsidy at the office of the Deputy Director, Farmer Welfare and Agriculture Development, in the district.
3. Yantradoot villages are selected by the department, so farmers do not apply for them separately.
